TREMCO ANTI-THEFT SYSTEM

Tremco Emergency Products Anti-Theft System prevents emergency vehicle theft, when the vehicle is left running with the key in the ignition.

IT IS 100% RELIABLE, CONVENIENT, INEXPENSIVE AND EASY TO INSTALL!

When personnel arrive at an emergency or at a hospital, they place the vehicle into "park" and often times leave the vehicle running. The Tremco Integrated Anti-Theft System automatically activates as soon as the vehicle is put into "park". A would-be thief will not be able to shift the vehicle into "drive" which will prevent the theft. When personnel return to the vehicle, they deactivate the anti-theft system and are on their way in seconds.

This system also provides 24-hour protection for your vehicles when not in service. If the vehicle is not in use and the keylock is destroyed, the shifter will not release. For the past 30 years, this tool has protected thousands of emergency vehicles from the liability of chases, fatalities, damage to vehicles and loss of equipment.

Our unique camouflage system blends in with the surrounding components for convenient everyday use. And for all emergency package vehicles, the system plugs into existing harnesses so there is no need for cutting or splicing wires. This allows for a quick, safe installation which will not void existing vehicle manufacturer warranties.

FOR YOUR UNMARKED VEHICLES, TOO!
